

NEW RK SERIES

RK250-6

Rough Terrain Crane

Max. Lifting Capacity: 25 ton x 3.5 m

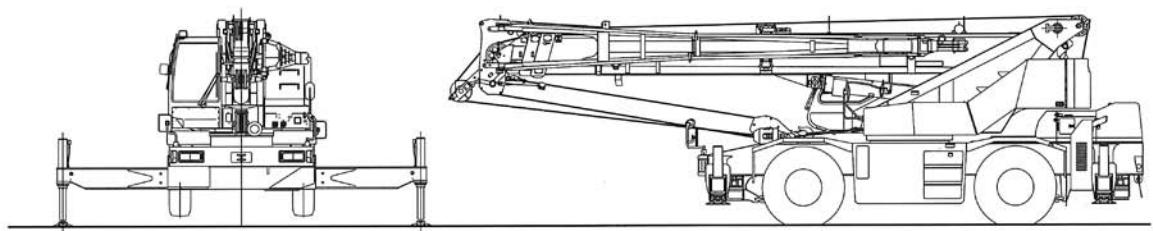

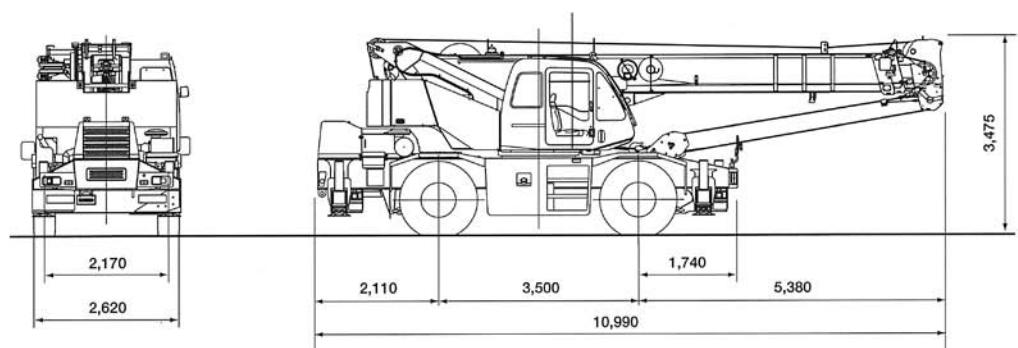

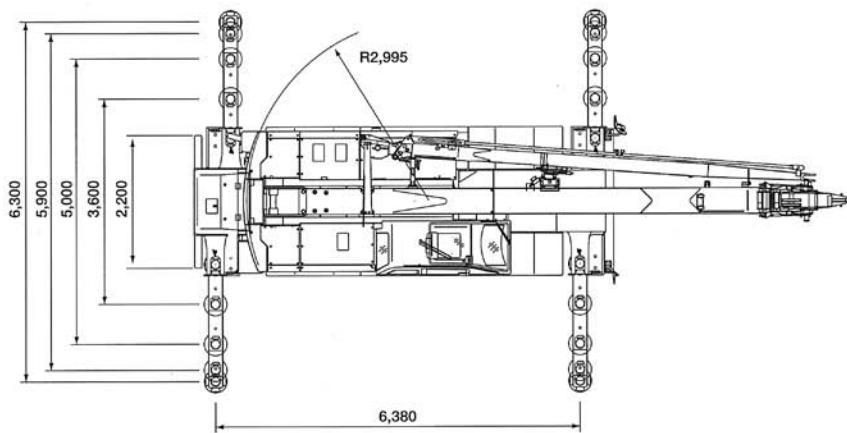

UPPER STRUCTURE

| Crane Performance | | | | |
|--|--|---------------------------------|--|--|
| Max. rated load | 9.32 m boom | 25,000kg×3.5m (7-line) | | |
| | 16.42 m boom | 19,000kg×4.0m (6-line) | | |
| | 23.52 m boom | 12,500kg×5.0m (4-line) | | |
| | 30.62 m boom | 7,000kg×8.0m (4-line) | | |
| | 7.5 m jib (max.) | 3,000kg (single-line) | | |
| | 12.0 m jib (max.) | 2,000kg (single-line) | | |
| | Aux.sheave (max.) | 4,000kg (single-line) | | |
| Main boom length | 9.32m to 30.62m | | | |
| Jib length | 7.5m/12.0m | | | |
| Hook height | 31.9m(main hook), 43.6m(jib hook) | | | |
| Operating radius | 28.2m(boom), 35.5m(jib) | | | |
| Line speed | Main : 125 m/min (at 4th layer) Aux : 108 m/min (at 2nd layer) | | | |
| Boom telescoping speed | 90.0 sec/21.3m | | | |
| Boom raising speed | 48.7 sec/0° to 82.3° | | | |
| Swing speed | 2.81min⁻¹ (2.81rpm) | | | |
| Boom Structure | | | | |
| Main boom | Four section, box construction. 2nd section independently telescoping, and 3rd and 4th sections simultaneously telescoping | | | |
| Jib | Compressed truss, box construction, 2-step drawing up type. Power set jib. 3-step variable tilt type, offset angle 5°25'and45" | | | |
| Boom hoist device | Direct forced type by double acting hydraulic cylinder | | | |
| Load hoist device | Hydraulic motor drive with spur gear reduction with auto-brake, independent 2 winches | | | |
| Swing device | Hydraulic drive motor with planetary gear reduction with negative brake, free/lock selector type | | | |
| Outrigger | Type | Hydraulic H-type | | |
| | Extension width | 6.3m, 5.9m, 5.0m, 3.6m and 2.2m | | |
| Wire rope | | | | |
| Main winch wire rope | 16mm dia. x 170m IWRC 6 x F (29) | | | |
| Aux.winch wire rope | 16mm dia. x 92m IWRC 6 x Ws (26) | | | |
| Hydraulic system | | | | |
| Hydraulic pump | 2 variable plunger pumps + 3 gear pumps | | | |
| Hydraulic oil tank | 380 liters | | | |
| Safety device | | | | |
| Moment limiter (auto-stop), Multi display (include backward check camera), Swing range limit device, Working range limit device, Swing automatic stop device, Overhoist prevention device (auto-stop), Base machine inclination meter, interceptive lever lock for on and off, Outrigger extension width automatic detecting device, Auxiliary brake for operating, Swing lock device Safety lock lever, Hydraulic safety valve, Sling wire lock, Boom telescoping default operation prevention device, Boom telescope safety device, Boom hoist safety device, Check & Safety Monitor, Winch drum safety device, Swing alarm lamps, Outrigger safety device, Free fall interlock device, Monitoring camera for drum | | | | |

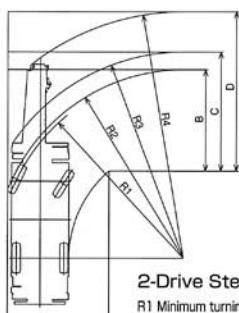

CARRIER

| Carrier performance | | | | |
|---|---|---|--|--|
| Max. travel speed | 49km/h | | | |
| Gradeability | $\tan\theta$ 0.57 (30°) | | | |
| Min. turning radius | 8.4 m - 2WS 5.0 m - 4WS | | | |
| Engine | Model | MITSUBISHI GM60-TLE2A | | |
| | Type | Water cooled, 4 cycle, 6 cyls, direct injection diesel with intercooler turbocharger | | |
| Total displacement | 7,545L | | | |
| Max. output | 200kW/2,700min⁻¹ [272PS/2,700rpm] | | | |
| Max. torque | 785N·m/1,400min⁻¹ [80kgf·m/1,400rpm] | | | |
| Steering | | | | |
| Travel drive type | 4WD (4x4) / 2WD (4x2) selecting type | | | |
| Torque converter | 3 elements, 1 stage, 2 phases | | | |
| Transmission | Model | Electronic control full automatic with lock-up | | |
| | No. of speed shift | 3 speed forward / 1 speed reverse (with high/low shift) | | |
| Reduction unit form | Axle 2 step reduction unit | | | |
| Axle front wheel/rear wheel | All floating type with pneumatic suspension | | | |
| Steering | Form | Hydraulic power steering with emergency steering device and about-face steering compensation device | | |
| | Mode | Normal (front 2W), cramp (4W), crab (4W) and rear (rear 2W) | | |
| Brake | Mainservice | Hydraulic disc brake with air booster, on all wheels | | |
| | Auxiliary | Torque converter lock-up linked electronic exhaust brake, with ABS system | | |
| | Parking | Propel shaft brake internal expansion type with auxiliary brake for crane operation | | |
| Fuel tank capacity | 300 liters | | | |
| Tires (front and rear) | 385/95 R25 170E ROAD | | | |
| Safety device | | | | |
| Emergency steering device, Rear steering auto-lock, Suspension lock device, Engine overrun warning device, Check & Safety Monitor, Boom mirror, reverse travel buzzer | | | | |
| Measurement | | | | |
| Overall length | 10,990mm | | | |
| Overall width | 2,620mm | | | |
| Overall height | 3,475mm | | | |
| Wheel base | 3,500mm | | | |
| Tred | 2,170mm | | | |
| Front overhang | 5,380mm | | | |
| Rear overhang | 2,110mm | | | |
| Total weight | | | | |
| Total load | 26,495mm | | | |
| Front axle load | 13,250mm | | | |
| Rear axle load | 13,245mm | | | |
| Passenger | | | | |
| | 1 person | | | |

KOBELCO

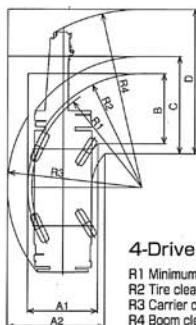

Dimensions

TURNING RADIUS

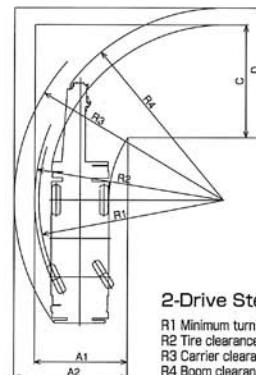

2-Drive Steering (Front)

R1 Minimum turning radius: 8.40 m
R2 Tire clearance with cab: 8.58 m
R3 Carrier clearance: 9.39 m
R4 Boom clearance: 11.22 m
A Entrance width (carrier): 4.61 m
B Exit width (carrier): 4.61 m
C Exit width (tires): 5.42 m
D Exit width (boom): 7.25 m

4-Drive Steering

R1 Minimum turning radius: 5.00 m
R2 Tire clearance with cab: 5.18 m
R3 Carrier clearance: 6.11 m
R4 Boom clearance: 8.75 m
A1 Entrance width (tires): 3.19 m
A2 Entrance width (carrier): 4.43 m
B Exit width (tires/carrier): 3.19 m
C Exit width (carrier): 4.43 m
D Exit width (boom): 6.57 m

2-Drive Steering (Rear)

R1 Minimum turning radius: 8.40 m
R2 Tire clearance with cab: 8.58 m
R3 Carrier clearance: 9.51 m
R4 Boom clearance: 4.21 m
A1 Entrance width (tires): 3.19 m
A2 Entrance width (carrier): 5.13 m
C Exit width (carrier): 5.13 m
D Exit width (boom): 5.90 m

BOOM LIFTING CAPACITIES

NOTES

OPERATION WITH OUTRIGGERS

1.Rated load do not exceed 75% of the tipping loads with machine set horizontally on a firm and level ground, satisfy the specified stability over the front, and include weight of hook block(s) and other handling accessories. Ratings shown in are based on the machine's structural strength, and others are determined by the machine's stability.

2.The working radius given in the charts allow for loaded boom deflection. Always operate the machine on the basis of actual operating radius.

3.Weight of hooks, hook blocks, slings and other lifting devices are a part of the total load. Their total weight must be subtracted load to obtain the weight that can be lifted.

| | | |
|--------|--------|---------|
| Hooks | 25-ton | 4.0-ton |
| Weight | 200kg | 70kg |

4.Maximum outrigger extension is 6.3 m. Three intermediate extension positions are also provided at 5.9 m, 5.0 m and 3.6 m. Minimum outrigger extension is 2.2 m.

| Outrigger extension | 5.9m | 5.0m | 3.6m | Min. outrigger extension |
|---------------------|------|------|------|--------------------------|
| α^* (Front) | 33° | 28° | 19° | 9° |
| β^* (Rear) | 30° | 25° | 17° | 7° |

5.Rated load in the over-the-side whole around various depending on the extension position of outriggers. Therefore, crane operation must be performed based on the rating chart corresponding to each extended outrigger position.

6.To determine load ratings that fall between those shown in the charts, proceed as follows:

a) For boom lengths not listed use rating for next longer boom length or next shorter boom length, whichever is smaller.

b) For load radii not shown, use rating for next larger radius.

7.Ratings of the auxiliary sheave are the same as main boom ratings, but should not exceed 4,000 kg. Ratings of the auxiliary sheave are calculated by deducting 25-ton hook weight (200 kg) from main boom ratings.

8.Jib operation must be based on the main boom angle.

9.Ratings of the boom with extended jib are calculated by deducting 1,550 kg at 7.5 m jib or 1,750 kg at 12.0 m jib besides the weight of 25-ton hook block and the sling wire from the rated loads. At this time, do not use the auxiliary sheave.

10.In such a condition not shown in the rating chart, operation is impossible. Lowering the boom over critical degrees leads to overturn even with no load. Be careful extremely.

11.Standard hoist reevings are shown below. Rated single-line pull must not exceed 4,000 kg.

| Boom length | 9.32m | 16.42m | 23.52m | 30.62m | Jib aux. sheave |
|----------------|-------|--------|--------|--------|-----------------|
| Hook | | 25-ton | | | 4.0-ton |
| No. of reeving | 7 | 6 | 4 | 4 | 1 |

12.In order to prevent a load from falling down to mistake of operation, do not use free-fall in crane operation.

13.In lifting load operation in an oblique direction (direction toward the outrigger), sometimes the outrigger float in the diagonal side against the lifted load may be raised depending on a condition. This is caused by torsional rigidity and deflection of the carrier frame, and stability is not lost. The stability of this machine in operation within the rating is secured in the condition that the machine is set horizontally on a level and firm ground.

OPERATION WITHOUT OUTRIGGERS (ON TIRES)

1.Rated load do not exceed 75% of the tipping loads with machine set horizontally on a firm and level ground, satisfy the specified stability over the front, and include weight of hook block(s) and other handling accessories. Ratings shown in are based on the machine's structural strength, and others are determined by the machine's stability. Tire specified air pressure is set to 900 kPa (9.00 kgf/cm²)

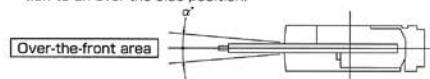

2.The working radius given in the charts allow for loaded boom deflection. Always operate the machine on the basis of actual operating radius.

3.Weight of hooks, hook blocks, slings and other lifting devices are a part of the total load. Their total weight must be subtracted load to obtain the weight that can be lifted.

| | | |
|--------|--------|---------|
| Hooks | 25-ton | 4.0-ton |
| Weight | 200kg | 70kg |

*Tire specified air pressure: 900 kPa (9.00 kgf/cm²)

4.Load ratings differ for over-the-front and over-the-side operation. Care must be taken avoid overload when swinging a load from an over-the-front position to an over-the-side position.

| On tires | Stationary | Pick & carry |
|-------------------|------------|--------------|
| $\alpha^*(FRONT)$ | 1° | 1° |

5.Ratings of the auxiliary sheave are the same as main boom ratings, but should not exceed 4,000 kg. Ratings of the auxiliary sheave are calculated by deducting 25-ton hook weight (200 kg) from main boom ratings.

6.Do not use jib operation and free fall.

7.Parking brake and auxiliary operation brake must be applied during stationary load lifting.

8.Pick and carry operations must be done in the low travel mode.

9.During pick and carry operations, keep the load close to the ground to avoid swaying, and travel no faster than 2.0 km/h. Avoid cornering, sudden starts (acceleration), and sudden braking. Boom must be centered over the front area.

10.Do not operate the crane functions while carrying the load.

11.Standard hoist reevings are shown below. Single-line load must not exceed 4,000 kg.

| Boom length | 9.32m | 16.42m | 23.52m | Jib aux. sheave |
|----------------|-------|--------|--------|-----------------|
| Hook | | 25-ton | | 4.0-ton |
| No. of reeving | 7 | 4 | 4 | 1 |

BOOM LIFTING CAPACITIES
